

Automa8 Limited is a MAS Registered Consultant

Automa8 Limited is an independent consultancy providing specialist expertise in specifying and planning automation to ensure it best suits your current and planned needs into the future. With additional services for Design for Assembly and Design for Manufacture, we can discuss the options for expansion from an independent, holistic point of view.

We are registered on the Manufacturing Advisory Service (MAS) Directory www.masdirectory.org which means your project may also be eligible for grant support.

MAS is here to support growth in England's SME manufacturing sector, and can provide **up to 50% funding** (from £300 to £3000) for consultancy projects to help you increase your competitive edge. Put simply, this makes it more affordable for you to get your project moving and keep costs to a minimum... We want to ensure a maximum return on your bottom line.

MAS is able to consider funding projects that look at virtually any aspect of your business from your products, processes and people to the supply chain and markets you operate in. You're in control... YOU choose the consultant. YOU choose the project that will help grow your business. MAS will support it*.

The MAS funding process is quick and simple, with only a two-page form to complete, and a typical grant application is signed off in under a week, following a manufacturing review.

Find out more about MAS by visiting www.mymas.org

*All projects are subject to MAS approval. Some restrictions apply.

Call or email automa8 at enquiries@automa8.co.uk / 07855 038 604 to discuss your specific needs and arrange a no-commitment visit to see what can be done for your business expansion plans.
